DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4 and 6-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Penaranda, et al. (US 6,186,656) in view of Priestman (US 2,822,198). The patents to Penaranda, et al. discloses the claimed invention including a circlip (16) engaging a housing portion of the appliance and removably connected to the drive shaft (4). The patent to Priestman teaches a circlip (10) having two legs (16,18) removably connected to a shaft (26) and engaging at least a portion (24) to restrict rotational movement of the circlip. Thus, it would have been an obvious matter of design choice to have provided the kitchen appliance of Penaranda, et al. with a removable circlip having two legs in the manner suggested by Priestman in order to have the circlip removably connected to the drive shaft and restrict rotational movement of the circlip, if so desired.

Response to Arguments
